EXECUTIVE SUMMARY

Analytical and detail-oriented Information Science graduate from the University of Colorado Boulder. Experienced in building data dashboards, leveraging AI tools, and delivering actionable insights using Python, HTML/CSS, and SQL. Passionate about turning data into decisions and building tools that make information accessible.

EDUCATION

Bachelor of Science in Information Science

University of Colorado Boulder

Relevant Coursework: AI Development, Data Analysis, Information Visualization, Web Design, Statistical Engineering

PROJECTS

Sensed - Senior Capstone

- Developed a full-stack web application that captures and structures user-generated emotional and sensory data tied to music
- Designed interactive dashboards and data-driven UI components to visualize personal music associations and enhance user engagement
- Collected and analyzed 100+ survey responses to identify user behavior trends and inform feature design and UX decisions
- Integrated the Last.fm API for song retrieval and metadata enrichment, enabling dynamic user experiences

Vinyl Vault - Music Data Platform (Full-Stack)

- Developed a web platform for cataloging physical music collections, supporting 100+ users
- Implemented AI/ML recommendation logic using artist, album, and genre data to enhance personalization
- Integrated Last.FM API to deliver personalized recommendations and detailed analytics for CDs, vinyl, cassettes, and more

Vinyl Resurgence Study - Independent

- Aggregated and cleaned large-scale datasets from RIAA, Discogs (CSV), and APIs (MusicBrainz, Last.fm) using Python and pandas
 - Built data visualizations with matplotlib to analyze long-term trends in vinyl sales, release counts, and format adoption metrics
 - Performed data normalization and exploratory data analysis (EDA) to compare vinyl vs. digital growth trends
-

WORK EXPERIENCE

Head of Data Analytics and Assistant Project Developer

Considera Core - Lakewood, CO

- Led the analytics team, which studied user feedback and helped to propel that into reasonable change
- Assisted the visual effects department and overlooked game design tests. Utilized Unity Game Engine
- Managed audio production and music integration into various video game projects with Ableton and Audacity

Marketing Management and Web Progression

Solaroid Studios - Denver, CO

- Assisted in merging mobile app into a fully fledged web application format. Employed HTML, CSS, JS, and SQL
 - Expanded Marketing through social media management and online cultivation in advertisement designs.
-

SKILLS

Technical: ML/AI, Python, SQL, Excel, HTML/CSS, GitHub, NumPy, Adobe Suite, Ableton, Power BI

Analytical: Data Cleaning, EDA, Data Visualization, Forecasting, Statistical Analysis, UI/UX

COMMUNITY INVOLVEMENT

Volunteer | CU Boulder Radio 1190 DJ

Volunteer | CU Boulder ATLAS Lab Tech
